Villa Melati Mas Vista, Jalan Vista IV blok V2 no. 31, Tangerang Selatan, Banten

I am a highly motivated and agile individual who have high interest to apply my skills and knowledge in computer science, specifically in web and mobile developing. I have a high enthusiasm for staying updated with the latest technological advancements, particularly in the web-app development industry. I am always eager to learn new things and keep up with the latest trends in designing and developing high-quality of applications.

Experiences

Sentra Vaksinasi Serviam - Santa Ursula   Sep 2021

IT Division

Sentra Vaksin Serviam is a vaccination event that was established in response to the COVID-19 pandemic to facilitate and administer vaccination programs.

- In the Sentra Vaksin Serviam event, within the IT Division as a non-medical staff member, my primary responsibility involves managing and processing data related to individuals receiving vaccinations.

ICPC - ICPC Foundation   Nov 2022

Contestant

The International Collegiate Programming Contest (ICPC) is a prestigious and renowned annual programming competition that brings together some of the brightest computer science and engineering students from universities around the world.

- I had the opportunity to participate in an ICPC (International Collegiate Programming Contest) competition, where teams of university students solve intricate algorithmic problems under a time constraint. During the competition, I am proud to say that our team successfully solved 5 out of the 10 challenging problems presented to us, showcasing our problem-solving skills and determination in a highly competitive environment.

COMPFEST - University of Indonesia   Jul 2023 - Sep 2023

Contestant

Compfest, short for "Computer Festival," is an annual event organized by the University of Indonesia (UI). It is one of the largest and most prestigious technology and information technology festivals in Indonesia.

- I had the opportunity to participate in Compfest, an IT competition with various sub-categories, and I chose to compete in the game development segment. During the event, I successfully created a captivating 2D pixel ninja game, but unfortunately I did not win in the competition.

Education Level

SMA Santa Ursula BSD - Tangerang Selatan, Banten

High School Diploma in MIPA

BINUS University - Tangerang Selatan, Banten

Undergraduate in Computer Science, 3.88/4.00

Organizational Experience

HIMTI - Tangerang Selatan, Banten   May 2022 - Present

Creative and Design Activist

The HIMTI organization, which stands for "Himpunan Mahasiswa Teknik Informatika" or Association of Computer Science Students, is a student association dedicated to students in the field of Computer Science. This organization is known for organizing a wide range of events related to IT, including seminars, training sessions, and various other engaging activities. Through these events, HIMTI provides a platform for students to enhance their knowledge and skills in the IT field, fostering a vibrant learning community within the organization.

- I work as a Creative and Design HIMTI Activist, where my tasks include creating and designing UI/UX aspects for the HIMTI organization's website, as well as creating aesthetically attractive posters for various events.
